The Times' Daily Short Story.

THE PILOT'S STORY

[Original.] "I was in the late onpleasantness," said the Mississippi pilot, "and it's my opinion that all this thing called heroism depends on circumstances. When a brave man's cornered he ain't any

to get out o' the way o' shot and shell." The boat was moving swiftly down with the stream, and the pilot was now pulling the wheel with all his strength, to get at him to get him out o' their then letting it fly around like a Fourth way, and pretty soon it was a stand off

better 'n a coward. I've butted up

ag'in fortyfications, and I've legged it

of July plnwheel. "But I don't have to draw on myself for an argyment. I was a stars and bars boy myself. I'll take one o' your fellers, as brave a man as ever fought under the stars and stripes. D'ye see that bank over thar? I remember a day when there was a good deal doin' on that bank. It was about fou' years after the close of the war, and the car petbag business was bumpin'. The gineral idee of a carpetbagger, both north and south, was a low down cuswithout any decency whatever. Some of em was. But Major MacEnery was a different sort. He had risen from the on till there was nothin but a few ranks in the Union army, and when the stray shots left near me; then I got up war was over, bein' only twenty-seven and made tracks fo' the bost, years old, he concluded to settle in the south and grow up with the country after its new birth. There was a lot of ed themselves in staterooms. The

reckon they all come to grief. "The major bought a plantation over house. I run aboard and, seein' no fects. thar. He didn't pay much fo' it, fo' it wasn't wo'th much. His neighbors tried to drive him out in var'us ways, but he was good pluck and refused to his hidis' place behind the engine, I was plot of the project and organize a boys' municipal with patience. But when the Esperant off, and, yankin' the engineer out of his hidis' place behind the engine, I was plot of the juvenile vourt of Salt departing delegates shook him with one, run out to the what, boat ag lo one, run out to the what, boat ag lo one, run out to the what, boat ag lo one, run out to the what, boat ag lo one, run out to the what, boat ag lo one, run out to the what, and if it can pick up such strays as these big ones in Oxfober, perhaps we are going to his hidis' place behind the engine, I was pilot of the grounds set apart for them and will him goodby the fortitude that had be driv. One day when I was pilot of the think to be ready for signals as soon Many jackets are braided all over the Talladega we come floatin' down as I got to the pilot house. In half a front, back and sleeves, with only the yere just as we're doin' now, and, might be the wheel Her stern plain collar and cuffs to give relief. roundin' to, puttin' her nose upstream, minute I was at the wheel. Her stern plain collar and cuffs to give relief. we tied up at a what boat over that to deliver the mail. I wanted to git some robaccer, so I tole the cap's I'd take the mail bag up. He tole me to go ahead, and, rollin' it under my armato' that wash't much in 'it-I struck out. I found a big crowd on the blue out. I found a big crowd on the blue out. out. I found a big crowd on the bluff. I handed in the mail bag, and just then in walked Major Mackinery. There was one letter in the bag, and that had the major's name on it. The postmaster handed it out to him.

"That made the crowd mad. One man said that yo' couldn't except only."

"He was the wo'st used up man I ever say. He stood on deek leading." and they follered me to the postoffice.

man said that yo' couldn't expect nother ever saw. He stood on deck lookin' in' better from a Yankee gav ment than to deliver only latters for Yankees. The major, who had seen all the fightis' he was gone. and went out, or, ruther, he was goin' Shiloh, he said, but I high't feel like out when one of the crowd put egt his foot and tripped him. The major stumbled, but didn't say nothin' He an executive to the other it was one to be the content of the wanted in the late war, tok his letter knowed it was intentional, but if he twenty, said shything there had have to fight "That's why I den't count on no for his life. There was a man he had man's bein' brave under all circumon his plantation in the crowd and two stances," EDWARD MORRISON.

SNAPSHOTS OF STYLES.

Eton and Bolero Jackets Still Reign. All Over Braided Conts Very Smart.

Let no woman delude herself into believing that the liolero and Eton have been deposed. They are echoed tled that to be under the major's wing. In the hip jackets, and one sees them next. They will be joined at Berlin by When the man that had tripped the also made short or waist length, ac. N. I. Stone of the department of commajor saw it didn't move him to give cording to fency. The sole novelty is merce and labor, who is the third memem a chance to kill him he roared out: in the disposition of the trimming or ber of the commission and who is now "Yo' Yankee carpetbagger, what d' in the cut. The trimming does not in Germany on special duty. The sendyo' mean by carryin' off the mail with vary widely from straps of cloth or jng of the commission is entirely volun-

braid, yet these are cleverly manipuhold, and the cap'n had bid in the pilot lated so as to present entirely new ef-

effects with vests or elaborately trim-med with braid.

have seen many meteors, chiefly at night, but I have never seen any act like this one," Spencer said. "When it was within half a mile of the sea it began rocking, or swinging, if you like; anyhow, going from side to side, and leaving a rigzag trail. It was bigger than my cabin, which is twelve feet wide, and it must have weighed tens. It was less than a mile away to the southward on the port beam, and when it struck the sea it must have cooked a million fish all around. The water boiled up to a height of twenty feet or dinary significance that some of the more and the vapor created by the leading unions should be taking very steam spread over a space wider than the length of this ship, and that is more than 550 feet. It was nearly half a minute before the sea went down." The Hamburg-American liner Brazilia,

in Sunday evening from Hamburg, also erved a great meteor when northeast

PENNIES FOR COLLEGE.

Higher Education of Werkmen Aim

of British Trades Unious. The British trades unions had not in their origin any direct concern with education. But it is a fact of no ordinary significance that some of the great interest in the higher educa-

tion of the workman. For the last three years some 100,-000 workingmen, members of the Amalgamated Society of Engineers. have made three levies of a penny each to help on the work of Rushin of Cape Race on Tuesday night, about each to help on the work of Ruskin three hours after the St. Andrew's ex- college at Oxford. This levy produced perience. The Brazilia's meteor was vist over £300 a year and by means of it ible for thirty seconds before it buried six engineers are maintained for a Smaller, but substantial, sums have been contributed to the same insti-

positors, by the Lanarkshire Miners' County union, by the Amalgamated Association of Beamers, Twisters and Drawers, by the Derbyshire miners and the Durham miners, while a large ber of other societies appear among the donors and subscribers.

Lunnties.

A "prominent" English physician has discovered that the time is coming when there will be more lunatics than The old fushioned beaver with long same persons in the world. Statistics, silky nap has come back to favor, and, of course, show this, as they will show as nothing has ever been found which anything that is good for advertising purposes. They will show that we live longer, that our general average of physical health is better and that we grow bigger than our ancestors, but that our minds are going to the bowwows. We suspect from some of the One of the smartest and prettiest of things like the above, written by great "alienists." that it takes a lunatic to detect lunacy, as a thief to catch a thief.

> The American Way. How an American machinery agent secured an order in Japan is related by the commercial agent of New South Wales in the far east as follows: It was a question of some lathes for a large factory which was being started. They were required of a certain size. The agent for the British firm said. "That is three inches longer than they are made, and we can make no alterntion." The American said, "I will make them to any size you like." The American secured the order. - United States Consular Report.

> > Shooting Butterflies.

The ancient question, "Who breaks a butterfly on a wheel?" should have a modern counterpart. A Transvani agricultural paper says: "A great deal can be accomplished toward reducing the numbers of the larvae of the swallowish butterfly by destroying the butterffer. The most effective instrument for this purpose is a light fowling place loaded with dust shot or course sait. It may seem ridiculous to advocate the shooting of butterfles, but an insect with such a large wang expanse affords a very good target."
